

George Barna's newest book is all about *Single Adults!*

George Barna's newest book is all about single adults - the 80 million-plus individuals who are not presently married. The book, entitled *Single Adults*, examines a wealth of data as the information relates to three separate singles populations: those who have never been married, those who are divorced, and those who are widowed.

In this journey, Barna describes the:

- ❑ self-image and self-identity of singles
- ❑ dominant lifestyle patterns
- ❑ life goals and moral views of singles
- ❑ role of faith in their lives
- ❑ content of single adults' faith in terms of their beliefs and practices.

The book also includes a section that compares the lives of born again singles with the lives of singles who are not disciples of Jesus Christ.

"I am not aware of any recent book that uses reliable data to provide such a broad perspective on the life of these three distinctive singles populations," commented Barna. "Given the daily increase in the number of single adults in America, the dramatic impact this huge population has on our nation, and how different each of these groups is in terms of their needs, morals, faith, goals and self-image, it is my prayer that this book will be a helpful guide for those who are serving single adults and helping them to experience meaning and spiritual health in their life."
